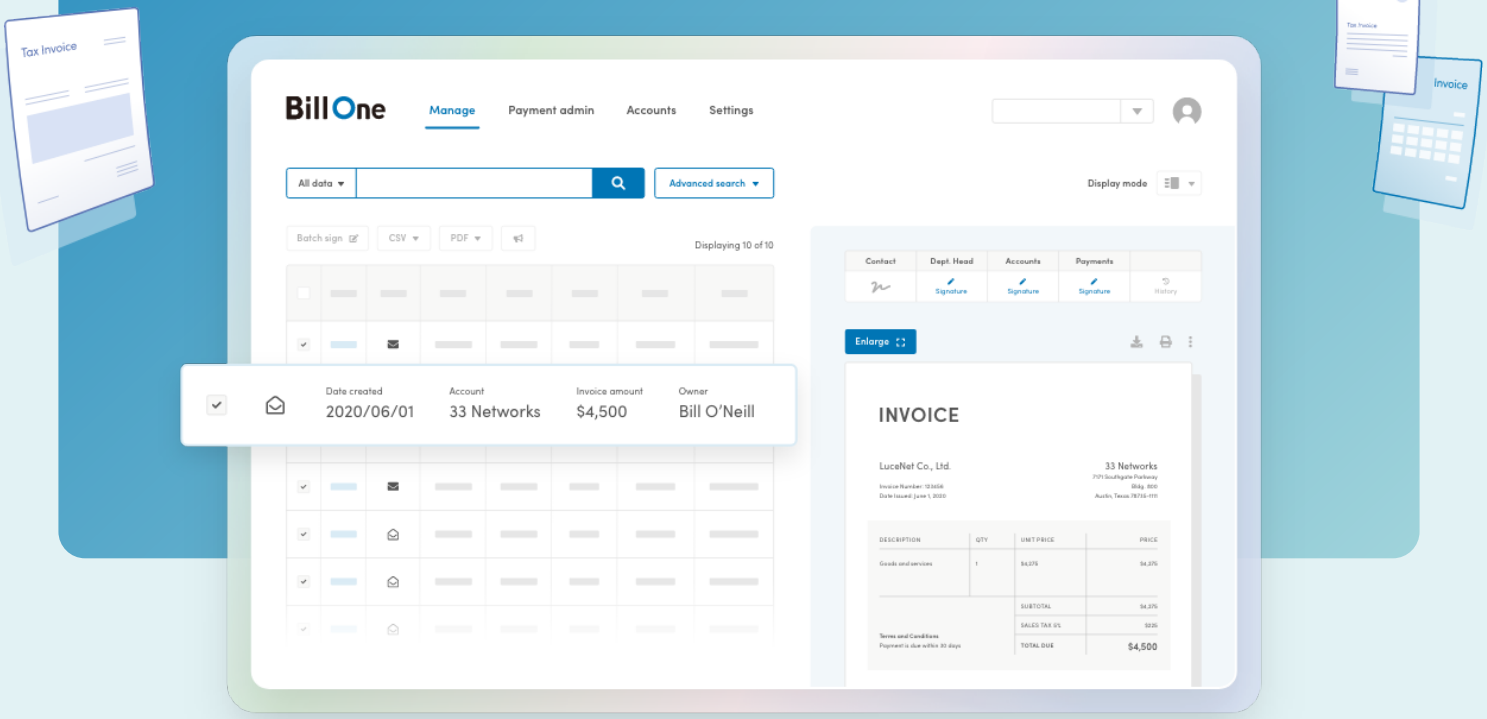
Strategic Invoice Management for Progressive Companies

Accelerate month-end closing for your teams to focus on higher value productivity.



As working away from the office becomes the norm, the manual nature of crucial business operations such as **invoice-processing** still presents challenges to effective remote work and unrealized efficiencies.

Welcome to Bill One - Your One-Stop Invoice Management Hub.

Bill One is a cloud-based invoice solution that helps forward-looking companies like yours receive and digitize paper and PDF invoices - transforming manual processes to paperless workflows that are fast, accurate and secure.

Besides uplifts in productivity, empower key stakeholders with the most accurate data for full oversight and control of your finances.

Business flow with paper invoices

When checking queries on invoices, it's more efficient to view invoices together.

It takes time to find the invoices you need to check.

Business flow with paper invoices heavily relies on individual effort, which reduces efficiency!

Communication problems

- Mailing costs between branches
- Confirming invoice details

Limited searchablitiy

- Can't track arrival
- Risk of loss

What BillOne can do

One-stop support for cloud-based receiving, approving, processing, and storing of invoices

Unified Control

• Vendors issue conventional invoices (no changes required from them)

• Bill One receives invoices in all formats on the company's behalf

Best-in-Class Accuracy

• Powered by AI x OCR x Human Operators

• 99.9% scanning accuracy, format-agnostic

Streamlined Workflows

• Streamlined flow for payment approvals

• Automatically assigns to person (dept.) in charge, including attribute info to invoices

Person in Charge of receiving invoices in your company starts fully digital Accounts Payable (AP) workflows in Bill One

Benefits of Bill One

Streamline your accounts payable (AP) process

Bill One takes the load and stress of receiving and processing invoices off your finance team.

- Bill One receives & digitizes invoices in the cloud
- Restructure paper-based workflows

Always-ready data for rich analytics and stress-free audits

Digitized invoice data means a wealth of information to take your team's decision-making to the next level.

- Capture key data points from all invoice sources
- Always-ready data accuracy

Strengthen corporate governance

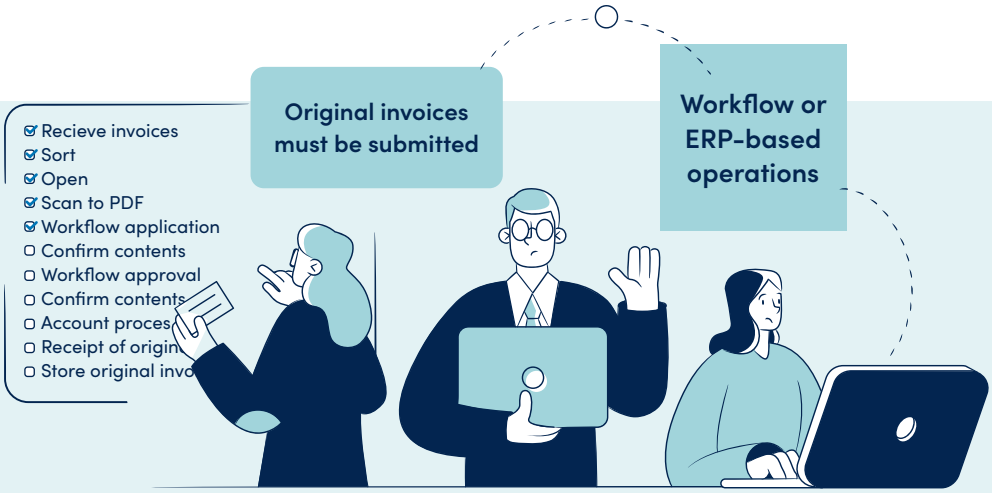
The time-sensitive nature of invoice-processing makes companies vulnerable to corporate accounts payable scams. Even more so as teams work remotely.

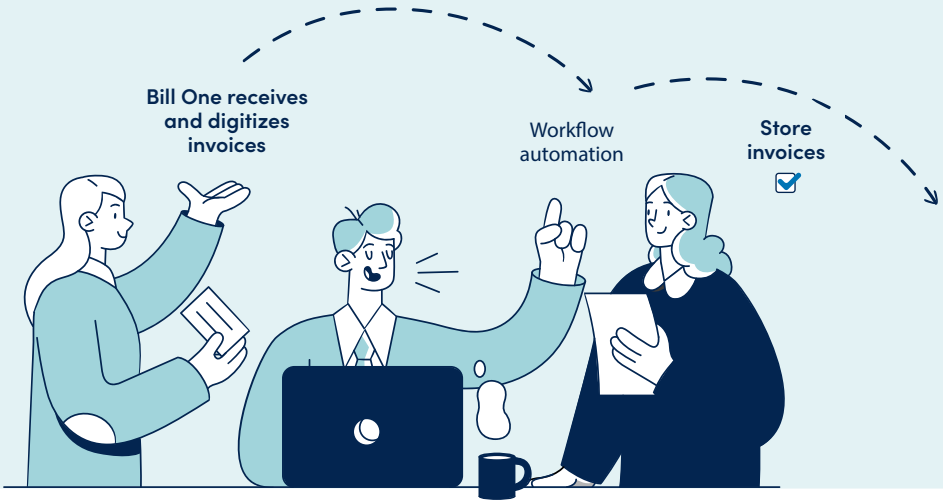
- Fully digital accounts payable process

Streamline your Accounts Payable

Bill One eliminates manual tasks such as: receiving, opening, sorting, PDF conversion, submitting to accounting department, storing in accounting department, responding to inquiries/ audits and more.

Without Bill One, the typical invoice processing workflow takes ~30 minutes per invoice.

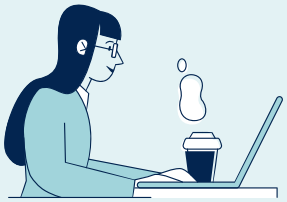




Save more than half the time needed with Bill One.

Bill One will transform how you process invoices

Linking improves business efficiency



No need to sort invoices

Notification always sent to person in charge of invoice processing

Added information to an invoice is **automatically filled in**, eliminating labor hours for input

*customer code, department, account information, etc.

Centralized management improves operational efficiency

All invoices are received; no need to check if they arrived, and **no risk of losing them**

Add status information to **manage progress of invoices**

Easily search for past purchase invoices and **check invoice details**

Key Features

Bill One receives, digitizes, and centralizes invoices for your company

Bill One receives invoices on your company's behalf and from all vendor sources. It then standardizes key data across different formats into your customized setup.

Best-in-class (99.9% accurate) digitization of invoices

Powered by Sansan's 14 years of AI expertise, Bill One achieves speedy 99.9% digitization accuracy of physical invoices in 11 languages - the first but most important step in mission-critical business operations such as invoice processing.

Let your workflows work for you

Automate and streamline end-to-end invoice process workflows, fully customized to your company's needs.

Extensive Vendor Management

Digitize important invoice information such as vendor information, billed amount, due dates and more. Up to 20 more customizable data points means that your teams don't miss out on any key invoice data points.

Automate notifications for invoice due dates and more

Set up customized notifications for each user profile and workflow, so your teams never miss out on key checkpoints and deadlines.

Why Sansan?

Since 2007, Sansan has been turning encounters into innovation through digitizing company data that is fast, secure and reliable.
